Dear Sir/Madam,

UPDATE ON UK DEPARTURE FROM EUROPEAN UNION (EU): CHANGES TO IMPORTS OF PLANTS AND PLANT PRODUCTS FROM 1 JANUARY 2021

On the 31 December 2020 the UK's transition period with the European Union comes to an end and I am writing to notify you of some changes to our phytosanitary import controls which may affect exports for your country from 1 January 2021. The changes being made are based on the principles set out in the WTO-SPS Agreement and further details are included in Annex 1 to this letter.

These changes only apply to imports into Great Britain (England, Wales and Scotland). Northern Ireland remains within in the European Union's (EU) Sanitary and Phytosanitary (SPS) area, so [EU import requirements](#) will continue to apply to imports into Northern Ireland.

Please note that certain notifications may have been made to the EU while the UK was a member state, based on EU legislation. These notifications are no longer applicable to the UK and certain requirements have changed. Therefore, it is important that all relevant notifications are received directly by the UK NPPO before 1 January 2021. A template to provide these notifications can be found in Annex 2 to this letter and once completed it should be emailed to UKNPPO@defra.gov.uk

There will be no changes to the operational processes for importing into GB from non-EU countries, for example pre-notification will continue to be required and checks will still be carried out at Border Control Posts.

The IT systems used to facilitate the pre-notification of imports of plants and other regulated articles will be changing, moving from the current PEACH system to a new service. However, GB importers will continue to use the existing system until they are directed to register for the new service. The timing and sequencing of this migration will ensure a smooth and orderly transfer between systems, and will allow sufficient time for exporters to become familiar with the new service. Technical support will be available during, and after migration. For any direct imports to

Scotland, importers should continue to notify the Scottish Government until the new GB wide IT system is rolled out.

Further details on the UK's phytosanitary import controls will be available on the [United Kingdom's country profile page on the International Phytosanitary Portal](#).

Any questions regarding this letter or the changes being made should be directed to the UK's IPPC official contact point via UKNPPO@defra.gov.uk.

Yours faithfully,

Professor Nicola Spence
UK Chief Plant Health Officer
nicola.spence@defra.gov.uk

Annex 1: Technical changes which have been made to GB legislation

How GB legislation is being amended

GB requirements, from 1st Jan 2021, are described in the retained EU law. For plant health, this retained EU law is the EU Plant Health Regulation (and it's associated tertiary legislation) as it stands on 31st Dec 2020 and as amended by [The Plant Health \(Amendment etc.\) \(EU Exit\) Regulations 2020](#) and [The Plant Health \(Phytosanitary Conditions\) \(Amendment\) \(EU Exit\) Regulations 2020](#). Jointly, these instruments create the retained EU law applicable to plant health.

GB requirements are no longer set out in the EU PCR, they have all been captured in [The Plant Health \(Phytosanitary Conditions\) \(Amendment\) \(EU Exit\) Regulations 2020](#). All references to schedules in the follow table are to the schedules in this piece of legislation.
